

RELIABLE MASTER DATA AT THE CORE OF YOUR BUSINESS

For SAP S/4HANA® environments

Weissr Connector places accurate and trusted master data at the center of your digital enterprise. With reliable information powering every process, your organization gains confidence and predictability.

Business outcomes

- Consistent financial and organizational structures across systems
- Reduced manual updates and integration effort
- Higher data quality and improved compliance and reporting accuracy
- Faster time-to-value through native SAP S/4HANA connectivity
- Stronger collaboration between finance, controlling, and IT teams

Weissr Connector — synchronize your core business structure

One place for all master data

Weissr Connector synchronizes key organizational master data across SAP S/4HANA and connected systems. It provides a single governed environment where users can align and manage foundational structures such as GL accounts, company codes, plants, cost centers, and profit centers, ensuring accuracy and consistency across the enterprise.
